Colombo, Sri Lanka

## ABOUT ME

Highly skilled Senior Software Developer with 8+ years of experience in backend and frontend development, cloud computing, and software architecture, specializing in designing scalable ERP solutions, optimizing system performance, and implementing secure, automated CI/CD deployment pipelines. Proven track record in cloud-native architectures, performance optimization, and high-impact solution delivery, combined with a passion for driving innovation, mentoring teams, and delivering high-quality software that enhances business efficiency and user experience in dynamic, collaborative environments.

Senior Software Developer with 8+ years in scalable ERP design, backend/frontend engineering, cloud-native architectures, and secure CI/CD. Strong record in performance optimization,

## WORK EXPERIENCE

### SENIOR SOFTWARE DEVELOPER

DAYARATHNE GROUP | SRI LANKA  
JAN 2023 - PRESENT

- Developed and enhanced ERP system modules to streamline business operations across multiple departments
- Built a user management module with permission-based access control to strengthen security and governance
- Optimized the operations module for resource tracking and workflow automation to improve process efficiency
- Contributed to sales, accounts, HR, vehicle management, inventory, and asset management modules within the ERP
- Integrated RabbitMQ with MassTransit to enable robust message queuing and asynchronous communication between services
- Implemented SignalR for real-time messaging and notifications to improve system responsiveness and user experience
- Contributed to the design and development of microservices architecture to improve modularity and maintainability
- Utilized Docker for containerization and Azure Container Registry for image management to standardize deployments
- Configured CI/CD pipelines using Azure DevOps to automate build, test, and deployment processes
- Deployed the ERP system on Microsoft Azure using Azure App Services and Azure SQL Database
- Used Portainer for container management and monitoring in the deployed environments
- Implemented security features including permission-based access controls, data encryption, and audit trails
- Optimized system performance and ensured high availability and scalability of ERP services
- Mentored junior developers and conducted code reviews to promote best practices and high code quality
- Led the design and implementation of scalable microservices architecture to support long-term system evolution
- Design and implement scalable backend services and APIs using modern frameworks and best practices
- Review and refactor teammates' code to ensure quality, maintainability, and adherence to coding standards
- Collaborate with product managers to translate business requirements into technical designs and implementation plans
- Mentor mid-level and junior developers through pair programming, code reviews, and technical guidance
- Own end-to-end delivery of complex features from design to production deployment and monitoring

mentoring, and delivering high-impact solutions. Highly motivated to join your team, contribute expertise, and help drive innovation in a collaborative environment.

## SKILLS

Version Control: Git, GitHub, GitLab, Subversion (SVN)

DevOps & Tools: Docker, Portainer, CI/CD Pipelines, Azure DevOps

Backend & Architecture: ASP.NET Core, Entity Framework Core, Web Services and RESTful APIs, Microservices Architecture, API Development and Integration

Frontend: HTML5, CSS3, JavaScript, Angular

Principles: OOP, OOD, Design Patterns, SOLID Principles, Performance Tuning and Debugging, Clean Coding Practices

Security & Cloud: Microsoft Azure, Data Encryption and Security, OAuth, JWT

Messaging: RabbitMQ and Mass Transit, SignalR

Soft Skills: Agile Methodologies, Mentoring, Code Reviews, Team Collaboration

## LANGUAGES

English

Sinhala

- Optimize application performance, scalability, and reliability through profiling, tuning, and architectural improvements
- Write and maintain automated unit, integration, and end-to-end tests to ensure code quality
- Participate in incident response, root cause analysis, and implementation of long-term stability improvements
- Contribute to technical architecture decisions, design documents, and long-term technology roadmap discussions
- Continuously improve development workflows, CI/CD pipelines, and engineering best practices across the team

### SOFTWARE DEVELOPER

EVICIO | SRI LANKA

JAN 2020 - DEC 2022

- Contributed to development of a comprehensive vehicle parking management system for a USA-based client.
- Developed real-time parking space tracking functionality.
- Integrated payment gateway systems including credit card processing, digital wallets, and QR code payments.
- Implemented parking reservation system backend logic.
- Developed admin dashboard for managing parking spaces and generating reports.
- Created parking analytics for space utilization, revenue tracking, and traffic patterns.
- Used ASP.NET Core 6.0 (C#), Entity Framework Core, SQL Server for backend; Angular (Version 13) for frontend.
- Integrated Stripe, PayPal, Apple Pay, and QR code payment options.
- Utilized Docker and Docker Compose for containerization.
- Deployed on Microsoft Azure with Azure App Services and Azure SQL Database.
- Managed containers with Portainer.
- Set up CI/CD pipelines using GitHub Actions and Azure DevOps.
- Implemented SignalR for real-time updates.
- Ensured security with OAuth 2.0, SSL encryption, and PCI-DSS compliance.

### SOFTWARE DEVELOPER

MALIBAN TEXTILES | SRI LANKA

JAN 2018 - DEC 2020

- Designed, developed, and deployed a custom Point of Sale (POS) system across 12 factories with 10,000 employees, processing an average of 120,000 daily transactions.
- Implemented barcode scanning to automate item entry during checkout.
- Developed real-time inventory tracking integrated with POS.

PERSONAL  
DETAILS

Date of birth  
08 Jan 1978

Nationality  
Sri Lankan

COURSES

CERTIFICATE COURSE IN  
CCNA

CERTIFICATE COURSE IN  
RHCE (RED HAT  
CERTIFIED ENGINEER)

- Built automated sales reporting and analytics system.
- Implemented role-based access control (RBAC) for security.
- Designed system architecture for high scalability and performance.
- Developed offline functionality to maintain operations during network outages.
- Used ASP.NET Web API Core 3.1 (C#), Entity Framework Core, SQL Server for backend; Angular (Version 9) for frontend.
- Deployed on Microsoft Azure with Azure SQL Database, Azure Blob Storage, and Azure Application Insights.
- Integrated POS with existing ERP and inventory management systems.

ASSOCIATE SOFTWARE DEVELOPER

SCAF.LK | SRI LANKA  
JAN 2017 - DEC 2018

- Designed, developed, and deployed a comprehensive online E-Learning platform to facilitate employee training and skill development across multiple locations.
- Provided structured learning modules, interactive assessments, and progress tracking.
- Developed user-friendly dashboards for employees, trainers, and administrators.
